

Training opportunities for undergraduate students

Curricular internship

Aimed at those who are regularly enrolled in a university course of study.

FBK accepts curricular internships for an Agreement and a Training Project drawn up by the promoter and agreed upon with Fondazione Bruno Kessler.

The duration must be agreed upon by the company tutor and the student on the basis of the number of hours required to obtain the training credits provided for by their study plan (in case of doubt, please contact the secretary of the department).

Thesis collaboration

Aimed at those who are regularly enrolled in a university course of study, have already obtained the credits for their curricular internship and are in the process of preparing their thesis.

FBK may activate collaborations for theses against the signing of an Agreement and a Training Project or the specific documentation requested by the University Department of affiliation of the student, drawn up by the sponsoring entity and agreed with Fondazione Bruno Kessler.

Collaborations "150 hours"

For those who are studying at the University of Trento and è are listed in the annual ranking for "specialist activities", "administrative activities" or "IT activities" relating to calls for such activities.

The collaboration can be started against an agreement in place with the University of Trento, a description of the activities planned and a declaration of "partnership" by each Department/Center Director of the University involved in the initiative.

The duration of collaborations varies from a minimum of 150 to a maximum of 400 hours.
