

Training opportunities for undergraduate students

Curricular internship

These are aimed at individuals who are regularly enrolled in a university degree program.

It is possible to activate curricular internships upon the establishment of an Agreement and a Training Project drawn up by the promoting University and agreed upon with the Fondazione Bruno Kessler.

The duration is to be agreed upon by the company tutor and the student, based on the number of hours to be completed to obtain the educational credits required by their study plan (in case of doubt, please contact your department secretariat).

Thesis Collaborations

These are aimed at individuals who are regularly enrolled in a university degree program, who have already acquired the credits necessary to carry out the curricular internship and are in the thesis preparation phase.

It is possible to activate thesis collaborations upon the signing of the specific documentation requested by the student's university department, drawn up by the promoting entity and agreed upon with the Fondazione Bruno Kessler.

Part-time student works "150-hour"

These are aimed at individuals who are regularly enrolled at the University of Trento and previously admitted to the annual ranking in "specialist activities," "administrative activities," or "IT activities" related to the calls for applications for these activities.

Collaborations can be initiated based on an existing agreement with the University of Trento, a description of the activities to be carried out, a "partnership" declaration from each Department/Center Directorate of the University involved in the initiative, and a selection of candidates indicated by the University.

The duration of the collaborations varies from a minimum of 150 to a maximum of 400 hours. The hourly compensation is established in relation to the type of collaboration foreseen and can vary from a minimum of €6 to a maximum of €9 per hour.
